	<p>If you want to protect the nature, you should start with yourself, and you can do it by changing your habits. To protect nature, we should <u>preserve</u> forests, land, water, and some resources such as minerals, fuels, natural gases, etc. There are many ways you can do to protect nature. Here are some simple choices for you to help the environment:</p> <ul style="list-style-type: none"> - Drive your car less, -Walk more: It's better to walk to work, if your workplace is nearby, don't take your car out every day; If there is a long distance, you can ride your bike and exercise at the same time. Whenever you don't drive your car, you make less pollution, so you use less fuel and also you save your money. <p>51. What does the underlined word "<u>preserve</u>" mean: a) stay b) keep c) fall down d) destroy</p> <p>52. If we change our bad habits, we can save nature. (True/ False)</p> <p>53. How can you save your money?</p> <p>54. When can you use your bike?</p>	
3	متن زیر را بخوانید و به سؤالات داده شده هر قسمت پاسخ دهید.	15
	<p>A planet is a body in space that goes around a star. There are 8 planets in our Solar System and these eight planets travel around the sun. The names of the planets are Mercury, Venus, Earth, Mars Jupiter, Saturn, Uranus, and Neptune. Planets travel in orbits around their stars. All of the planets of the Solar System revolve in <u>elliptical</u> orbits. In other words, their orbits are like large, flat circles. The time that it takes a planet to make one travel around the sun is called its year. The Greeks were the first people to recognize and give names to some of the planets. The word planet comes from a Greek word meaning <i>wanderer</i>. If a person wanders, this means that he goes from one place to another and does not have a home. The Greeks thought that the planet's "wandered" in the sky. However, modern scientists can tell the movement of the planets very truly.</p> <p>55. What is a planet's year? -----</p> <p>56. The word <u>elliptical</u> in line six means -----</p> <p>57. Venus, Mars and Neptune are a) stars b) planets c) wanderers d) both a and b</p> <p>58. The Greeks wandered in the sky. (True/ False)</p>	

We usually say that people have five senses. Senses are the way that we learn what is happening around us. The five main senses are sight, hearing, touch, taste, and smell. Each sense depends on a specific organ of the body. This organ receives the information and then the nerves send this information to the brain. For example, Eyes control sight, ears control hearing, and skin controls touch. Taste depends on the taste buds on the tongue, and smell depends on the nose. There are also other senses which are important as well. There is a sense of balance which stops us from falling down. We also have senses of hunger, thirst, heat, and cold.

59. We can understand the world around us by -----.
- a) using our noses
 - b) sending information to the brain
 - c) controlling our organs
 - d) using our five senses
60. The word “**sight**” in line six means the ability to -----.
- a) see
 - b) speak
 - c) touch
 - d) hear
61. Without a good sense of balance, people cannot -----.
- a) walk
 - b) fall down
 - c) drink
 - d) go hungry
62. Which sentence is **Not** true:
- a) Human being has more than five senses.
 - b) Nerves send the information to the brain.
 - c) We can taste food using the buds on our tongues.
 - d) Senses are some specific organs of a human body.
